

Award-winning air at Dubuque Greyhound Park & Casino

Here's a breath of fresh air—thanks to our state-of-the-art Total Spectrum Air-Filtration System, our customers breathe the highest-quality air of any entertainment venue in the area. Although this system involves sophisticated ultraviolet lights, photocatalysts and dynamic chemistry to eliminate airborne pollutants, benefits are simple—no clouds of smoke to spoil your fun.

Recently, our casino received the first-ever Gaming Vision Award for Outstanding Achievement in Environmental Design from the American Gaming Association and the Global Gaming Expo Institute. This facility was chosen as having the best air quality over hundreds of casinos across the country. So next time you're ready for a night on the town, come to the casino with the cleanest air—Dubuque Greyhound Park & Casino.
