

# ProGuard® Mobile Air Purifier

***Rapidly Cleans the Air,  
Destroys Airborne Viruses***

**ProGuard® Mobile Air Purifier safely destroys airborne contaminants including viruses, bacteria, volatile organic compounds and mold with no installation or ducting required!**

This new air purifying solution produces 1,200 CFM of clean air for facilities such as:

- Healthcare
- Restaurants
- Offices
- Schools & Universities
- Senior Living
- Retail Spaces
- Manufacturing Facilities
- Fitness Centers
- Dental Offices

ProGuard® Mobile Air Purifier uses safe chemical and particulate filtration for effective air purification. Gas-phase media includes filters made up of 100% activated carbon and 100% potassium permanganate that remove odors and harmful chemicals.

***Innovative technology delivering  
exceptional air quality for over 15 years***

## Stage 5

24"x24"x2" MERV 8 final filter with 100% Potassium Permanganate to ensure the destruction of any remaining pathogens.

## Stage 4

24"x24"x4" 100% activated carbon filter removes gaseous pollutants untouched by particulate filters.

## Stage 3

24"x24"x4" MERV 11 with high dust holding capacity for extended life and low pressure drop.

## Stage 2

Two germicidal UV-C lights installed to deactivate viruses, bacteria and mold.

## Stage 1

24"x24"x2" MERV 8 with 100% synthetic fiber media that prevents microbial growth.

\*MERV 8 + 11 in sequence is equivalent to MERV 13 per ASHRAE

# ProGuard® Mobile Air Purifier

Model #: PG-MAP-1200

## Industrial Strength, 5 Stage Air Purification

A centrifugal fan to circulate air through 5 stages of air purification, including 1 stage of germicidal UV-C. Double wall steel construction for maximum sound proofing and sturdy construction. Portable design with durable casters for ease of mobility. Plug and play simplicity, no installation required! Straightforward design with a durable, industrial-strength fan and easy access to replace standard sized filters and UV-C lamps.

## Technical Specifications

Color	White or Grey
Material	Galvanized Steel
Weight	284 lbs.
Noise Level	22 dB
Fan Capacity	1200 CFM
Power	330 W
Amps	2.9 A
Electrical	115-127 V, Single Phase, 60 Hz

*\*Global electrical configurations available*

## Shipping Specifications

- Palletized for protection and efficient delivery
- Pallet Dimensions: 22.8" x 22.8" x 62.2"
- Pallet Weight: 339.5 lbs.

## 6 Air Changes Per Hour!

Room Size (ft <sup>2</sup> )	Ceiling Height (ft)
1,200	10
1,334	9
1,500	8

*\*6 air changes per hour is the optimal recommendation per ASHRAE. Air changes dependent on room size.*
